11. Summary					
<p><b>(A) Mission:</b> To develop and strengthen the Austrian paramilitary program along the following lines; to develop the existing and potential paramilitary assets of 1) a labor union having units situated throughout Central and Eastern Austria, and 2) detached indigenous groups in the Salzburg-Tirol areas; to select and cache-equip suitable operational bases from which these groups may operate during hostilities; to establish an Evasion and Escape line from Eastern to Western Austria with feeder lines from the Czech and Hungarian borders and connecting links to the Swiss, Italian and German borders.</p> <p><b>(B) Plan:</b> To spot and recruit sufficient personnel to build the nuclear and skeletal groups needed to achieve peacetime development of the objectives outlined in (A) Mission; to spot and earmark for emergency recruitment those remaining personnel needed to activate the paramilitary program at full strength in the event of hostilities.</p> <p><b>(C) Summary:</b> Following are operational developments of the period under report:</p> <p>1. <b>Evasion and Escape:</b> During the past month operational activities have been restricted chiefly to additional spotting of potential wartime assets and basic, advanced and refresher training of the chief organizers of each section of the Evasion and Escape network.</p> <p>2. <b>Guerrilla Warfare:</b> During the reporting period a cleared group of U. S. Army personnel, under supervision of CIA staff employees, placed a supply of paramilitary weapons and equipment, sufficient to outfit 100 men, in several small caches in the Sangesgebirge area operational base.</p> <p>3. <b>Resistance:</b> Operational activities in this portion of the paramilitary program have been centered mainly on basic, advanced and refresher training of W/T operators.</p> <p><b>(D) Effectiveness:</b> Nothing to report.</p> <p><b>(E) Methods and Standards:</b> Not applicable.</p> <p><b>(F) Assets:</b></p> <p>1. It has become increasingly evident that GNPICLET 1, a potential E &amp; E organizer, is very unlikely to carry out the development of his section (eastern) of the main E &amp; E network. While GNPICLET 1 will be exploited as an organizer to the greatest possible extent, it will be almost certainly be necessary to select another agent to assume his responsibilities.</p> <p>2. (Please see paragraph 2 of C Summary for details of new GW (cache) assets.)</p>
